APPLIED Hydraulics & Pneumatics

1959 EDITORIAL INDEX

ACCUMULATORS

Accumulators—Selection Guide Jan. p 60

Stored Energy Closes Coal Car Doors
By J. H. Mercier Dec. p 82

AERONAUTICAL

Accessory Power For Space Vehicles
By Eugene T. Raymond Sept. p 81

Air Actuators Separate Thrust Unit Sept. p 87

Aircraft Fittings—Why They'll Be More Reliable
By D. F. Collins Nov. p 114

All-Pneumatic Aircraft Actuation
By John D. Hull, Jr. and A. E. Schmidlin May p 126

Design for Longer Fatigue Life
By F. D. Taylor June p 120

Design of Liquid-Spring Shock Absorbers for Landing Gear
By Edward Mucha Mar. p 114

Design Parameters for Missile Hydraulic Systems
By H. D. Davis Sept. p 140

Fast Response With 2-Stage Servo Valves Sept. p 105

Fluid Power for the Space Pilot
By Wilfred F. Talbot Sept. p 81

Fluids to 1000 F
By William R. Mayhew Sept. p 81

Future Pump Parameters
By Frank Mladinich Sept. p 81

Hot Gas Systems . . . What's Available? . . . What's the Future?
By Andrew V. Harris Oct. p 87

How a Load Sensitive Flight Control System Works
By John Burnett and Don Moses April p 110

In-Flight Fluid Power on the Jupiter
By Zelmar Barson Sept. p 148

Load Maintainer Checks Landing Gear Fatigue
By R. L. Gibbs Nov. p 110

Long Term Storage for Missile Hydraulic Systems
By M. Voytish, Jr. Sept. p 150

Mach 3 by '63 at Aero Hydraulics Conference Feb. p 102

Operation of Autopilot Servo Actuators
By Richard K. Smyth Mar. p 110

Power for Short Duration Missiles
By H. J. Howard and R. W. McJones Sept. p 100

Rotary Servo Valve for Aircraft Applications
By Jacques Faisandier Feb. p 100

Selecting Valves for Missile Pneumatics Sept. p 110

Special Component Designs in Bomarc Flight System
By Dan J. Tinius Sept. p 120

3000-psi Air Systems for the Regulus
By C. G. Brock Sept. p 126

What You Should Know About O-Rings For Air and Oil Circuits
By Richard A. Freedman July p 128

If you need extra copies of this editorial index, write to: Editor APPLIED HYDRAULICS & PNEUMATICS, 812 Huron Road, Cleveland 15, Ohio.

ASSOCIATION & TECHNICAL MEETINGS, SURVEYS, STANDARDS

Aircraft Hydraulic Symposium Report
By Henry Lefer Oct. p 140

Fabricating Machinery Forum June p 69

Fluid Contamination and Hot Gas Servos Orbit SAE Aircraft Meeting Dec. p 106

Hot Fluid Systems and Material Discussed by SAE Committee A-6 June p 126

How Fire-Resistant Fluids Are Used Today Nov. p 67

JIC Hydraulic Standards July p 81

Mach 3 by '63 at Aero Hydraulics Conference Feb. p 102

National Conference on Industrial Hydraulics
Program
Abstracts of Technical Papers Oct. p 98, 100

BOOSTERS

Air-Powered Test Rigs Improve Fighter Plane Production
By Leon N. Aldrich April p 116

Booster System Fits Molding Needs
By Islyn Thomas May p 108

CIRCUIT DESIGN

Accumulator System Supplies Six Servo Valves for Welding
By John H. Brems June p 86

Accuracy and Low Maintenance Put Hydraulics on Linotype
By William B. Abbott May p 103

Air Controls Oil Power on Army's New Bat
By Frank A. Glomb, W. Horace Leathers, Jr. and Turner G. Timberlake May p 88

Air Valves Sequence Clamp, Work, and Eject Cylinders June p 98

Boost to 5000 psi to Pierce Auto Frames
By John R. Danly, Jr. and Cecil E. Novinger May p 80

Cam Controls Deceleration of Bomarc Shelter Roof
By William V. Edwards and Robert W. Wilson Oct. p 136

Cam Controls Pressure on Press Blank Holder Plate
By W. I. Govan June p 72

Circuit Changes Prevent Hunting of Compensated Pump
By John P. Sharp and John P. Snyder Aug. p 73

Counterbalance Protection for Polaris Erector
By G. Duane Shaw Sept. p 90

Counterbalance Control with Servos
By Ralph L. Ford Feb. p 94

Cylinder Design Gives High Force Stripping
By John Danly, Jr. and Cecil E. Novinger April p 106

Design Ideas from a Large Stretch Forming Press
By C. E. Blanchard June p 74

Double Differential Circuit Gives Fast Speed in Both Directions
By Homer D. Wilson and James Bentley June p 82

Electrical Controls Sequence Air-Oil Meat Press
By Jack R. Clemens Mar. p 82

Electrohydraulic Circuit Levels Combine Dec. p 102

Equalizing 35,000 Tons
By M. P. Sieger and A. K. Beedle June p 79

Feed and Clamp Circuits for a Transfer Machine
By David W. Junttila Mar. p 96

Fine Control of Air Cylinders to Tip Ore Car
By John W. Hislop May p 116

Fine Tilt Speed for a Furnace
By J. L. Hoff and R. P. Rankin March p 94

Flow Control Valve Positions Pump to Keep Constant Speed
By R. J. Murphy Dec. p 92

How the Bomarc Gets Flight Tested on the Ground
By Otto Grupp Sept. p 116

Master-Slave System Synchronizes Telescoping Cylinders
By Jay M. Roth Dec. p 100

Metering Pump Circuit Eliminates Viscosity Effect
By J. R. Fawcett Aug. p 86

New Hydrostatic Drive Uses Variable Displacement Piston Motor
By Walter Shaffer Mar. p 67

Open Center System, Closed Center System . . . How Do They Compare?
By K. V. Kirkpatrick Dec. p

Pilots Trigger Relief Valve
By George MacLean Mar. p 86

Pressure Switch Selects System Pressure
By Albert Pure May p 106

Pump Controls for a Scrap Baler
By William Hunter June p 90

Reciprocating Circuit Has Emergency Return
By Harold A. Yarnell Nov. p 96

Saving Air with Pneumatic Die Cushions
By Don W. Smith Aug. p 88

Separate Circuits Control Spindle and Tracers
By Earl P. Brane Feb. p 84

Sequencing a Walking Beam Conveyor
By Val A. Mayer May p 84

Servo Controlled Fluid Motors Drive Multi-Tool Machine
By Robert K. Sedgwick Feb. p 90

Speed and Tension Control with Variable Displacement Pump and Motor System May p 114

Synchronize Cylinders with a Torsion Bar
By J. R. Fawcett Mar. p 78

Synchronizing Rotary Actuators
By Elmer F. Heiser Nov. p 100

Tandem Cylinder Circuit Changes Board Width on Rip Saw
By Gust Peterson May p 76

3000-psi Air Systems for the Regulus
By C. G. Brock Sept. p 126

3 Efficient Speed Control Circuits with Variable Displacement Pumps Mar. p 72

Three Fluid Motors Rotate 100-g Centrifuge
By D. T. Kuczon and R. C. Hinck Sept. p 134

APPLIED Hydraulics & Pneumatics

1959 EDITORIAL INDEX

Electrohydraulic Circuit Levels Combine Dec. p 102

Equalizing 35,000 Tons
By M. P. Sieger and A. K. Beedle June p 79

Feed and Clamp Circuits for a Transfer Machine
By David W. Junttila Mar. p 96

Fine Control of Air Cylinders to Tip Ore Car
By John W. Hislop May p 116

Fine Tilt Speed for a Furnace
By J. L. Hoff and R. P. Rankin March p 94

Flow Control Valve Positions Pump to Keep Constant Speed
By R. J. Murphy Dec. p 92

How the Bomarc Gets Flight Tested on the Ground
By Otto Grupp Sept. p 116

Master-Slave System Synchronizes Telescoping Cylinders
By Jay M. Roth Dec. p 100

Metering Pump Circuit Eliminates Viscosity Effect
By J. R. Fawcett Aug. p 86

New Hydrostatic Drive Uses Variable Displacement Piston Motor
By Walter Shaffer Mar. p 67

Open Center System, Closed Center System . . . How Do They Compare?
By K. V. Kirkpatrick Dec. p

Pilots Trigger Relief Valve
By George MacLean Mar. p 86

Pressure Switch Selects System Pressure
By Albert Pure May p 106

Pump Controls for a Scrap Baler
By William Hunter June p 90

Reciprocating Circuit Has Emergency Return
By Harold A. Yarnell Nov. p 96

Saving Air with Pneumatic Die Cushions
By Don W. Smith Aug. p 88

Separate Circuits Control Spindle and Tracers
By Earl P. Brane Feb. p 84

Sequencing a Walking Beam Conveyor
By Val A. Mayer May p 84

Servo Controlled Fluid Motors Drive Multi-Tool Machine
By Robert K. Sedgwick Feb. p 90

Speed and Tension Control with Variable Displacement Pump and Motor System May p 114

Synchronize Cylinders with a Torsion Bar
By J. R. Fawcett Mar. p 78

Synchronizing Rotary Actuators
By Elmer F. Heiser Nov. p 100

Tandem Cylinder Circuit Changes Board Width on Rip Saw
By Gust Peterson May p 76

3000-psi Air Systems for the Regulus
By C. G. Brock Sept. p 126

3 Efficient Speed Control Circuits with Variable Displacement Pumps Mar. p 72

Three Fluid Motors Rotate 100-g Centrifuge
By D. T. Kuczon and R. C. Hinck Sept. p 134

COMPONENTS
(See also specific components)

Actuators, Rotary, Torque—Selection Guide Jan. p 62

Aftercoolers, Air—Selection Guide Jan. p 64

Compressors, Air—Selection Guide Jan. p 66

Coolers, Oil—Selection Guide Jan. p 62

Design for Longer Fatigue Life By F. D. Taylor June p 120

Gages, Pressure—Selection Guide Jan. p 94

Lubricators, Air Line—Selection Guide Jan. p 98

Single Unit Divides Flow Equally By M. Van Dusen Dec. p 73

Standard Components For Servo Accuracy By Edward Stahnke April p 90

CYLINDERS

Cylinder Design Gives High Force Stripping By John Danly, Jr. and Cecil E. Novinger April p 106

Cylinder Design Gives High Lift Dec. p 78

Cylinders, Air—Selection Guide Jan. p 68

Cylinders, Hydraulic—Selection Guide Jan. p 72

How to Retract Air Cylinders By Elmer F. Heiser Mar. p 102

Master-Slave System Synchronizes Telescoping Cylinders By Jay M. Roth Dec. p 100

Metering Tube Gives Constant Acceleration and Deceleration By Norman Roden Aug. p 92

Rapid Approach with Variable Area Cylinder Dec. p 94

Tandem Cylinder Circuit Changes Board Width On Rip Saw By Gust Peterson May p 76

ELECTRICAL CONTROLS

Electrical Controls Sequence Air-Oil Meat Press By Jack R. Clemens Mar. p 82

Electrical Design to Cut Maintenance By V. Spagnuolo Aug. p 84

How to Electrically Interlock a Hydraulic Index By Warren C. L. Fricke May p 120

Limit Switches—Manufacturers Specifications Aug. p 65

Motor Control Circuits for Hydraulic Presses By Kenneth B. Rexford Aug. p 76

165-psi Hydraulics Quietly Positions Hospital Bed April p 130

Pressure Switch Selects System Pressure By Albert Pure May p 106

Pressure Switches—Manufacturer's Specifications Aug. p 65

Solenoids—Manufacturer's Specifications Aug. p 65

Switches, Pressure—Selection Guide Jan. p 120

Timers—Manufacturer's Specifications Aug. p 65

FLUIDS, FILTERS, RESERVOIRS

Checklist for Fire-Resistant Fluids By John J. Pippenger Mar. p 150

Filters, Hydraulic—Selection Guide Jan. p 84

Fluids, Hydraulic, Petroleum Base—Selection Guide Jan. p 156

Fluids, Hydraulic, Synthetic—Selection Guide Jan. p 156

Fluids to 1000 F By William R. Mayhew Sept. p 81

How Contamination Affects Servo Valve Design By Richard E. Osgood Feb. p 79

How Fire-Resistant Fluids Are Used Today Nov. p 67

Packing Materials for Fire-Resistant Fluids By E. W. Fisher Nov. p 74

Viscosity Stability of Hydraulic Fluids By N. W. Furby and R. I. Stirton April p 84

FLUID MOTORS & ROTARY ACTUATORS

Air Nozzle Switches Rotary Actuator Circuit By Henry E. Boraten Nov. p 94

Flow Control Valve Positions Pump to Keep Constant Speed By R. J. Murphy Dec. p 92

High Response Fluid Motors Drive Flight Simulator By Gerald J. Granros and John F. Wroten, Jr. Oct. p 148

High Torque Motor Has Radial Crank Design By Russell Henke Nov. p 98

Hydrostatic Constant Speed Drive for Wide Speed Range By Frank J. Acton and Rober Denes Oct. p 82

Motors, Air, Rotary—Selection Guide Jan. p 100

Motors, Fluid, Gear-Type—Selection Guide Jan. p 102

Motors, Fluid, Vane-Type—Selection Guide Jan. p 100

Motors, Fluid, Piston-Type—Selection Guide Jan. p 104

New Hydrostatic Drive Uses Variable Displacement Piston Motor By Walter Shaffer Mar. p 67

Selecting Fluid Motors For Driving and Towing By Lester L. Myers and D. J. Arnold Dec. p 84

Synchronizing Rotary Actuators By Elmer F. Heiser Nov. p 100

MACHINE TOOLS

Counterbalance Control With Servos By Ralph L. Ford Feb. p 94

Feed and Clamp Circuits for a Transfer Machine By David W. Junttila Mar. p 96

How Fluid Power Actuates Transfer Machines By Raymond H. Dipple Nov. p 104

Prefab Valve Panel Saves Engineering Time By W. P. Bartz Mar. p 74

Separate Circuits Control Spindle and Tracers By Earl P. Brane Feb. p 84

Servo-Controlled Fluid Motors Drive Multi-Tool Machine By Robert K. Sedgwick Feb. p 90

Standard Components For Servo Accuracy By Edward Stahnke April p 90

Timed Air System Improves Ground Finish By Edward Moldovan May p 112

MAINTENANCE

Electrical Design to Cut Maintenance By V. Spagnuolo Aug. p 84

We're Not Afraid of Valve Maintenance Anymore By Robert Cox and Joseph Briggs Dec. p 88

MOBILE EQUIPMENT
(Including Marine and Missile Ground Support)

Air Controls Oil Power on Army's New Bat By Frank A. Glomb, W. Horace Leathers, Jr., and Turner G. Timberlake May p 88

Anti-Overrun Valve Controls Missile Erection By Harvey Jacobs Sept. p 107

Atomic Submarines Use Electro-hydraulic Servo Valves By Kenneth S. Knapton, Jr. and Dudley B. Hartung May p 78

Bomarc Launcher Hydraulics By Peter J. Calcagno Sept. p 88

Cam Controls Deceleration of Bomarc Shelter Roof By William V. Edwards and Robert W. Wilson Oct. p 136

Counterbalance Protection for Polaris Erector By G. Duane Shaw Sept. p 90

Cylinder Design Gives High Lift Dec. p 78

Decelerating With Accumulators By Albert C. Notary and Willard L. Huey Nov. p 88

Electrohydraulic Circuit Levels Combine Dec. p 102

Fine Control of Air Cylinders to Tip Ore Car By John W. Hislop May p 116

Flow Control Valve Positions Pump to Keep Constant Speed By R. J. Murphy Dec. p 92

Here's How Fluid Power Handles the Jupiter Nov. p 78

High Response Fluid Motors Drive Flight Simulator By Gerald J. Granros and John F. Wroten, Jr. Oct. p 148

High Torque Motor Has Radial Crank Design By Russell Henke Nov. p 98

Hydraulic Cable Brake Stops Cable Breaks By T. S. A. Greenwood and Derek S. Jackson Mar. p 106

Hydraulic Servomechanisms Steers Towed Airplane April p 114

Hydrostatics + Dynamics = Oil-Driven Chip Hammer By C. Huppert April p 96

Master-Slave System Synchronizes Telescoping Cylinders By Jay M. Roth Dec. p 100

Metering Tube Gives Constant Acceleration and Deceleration By Norman Roden Aug. p 92

New Hydrostatic Drive Uses Variable Displacement Piston Motor By Walter Shaffer Mar. p 67

Nike's Underground Launching System By R. W. King Dec. p 74

Open Center . . . Closed Center . . . How Do They Compare? By K. V. Kirkpatrick Dec. p 67

Reciprocating Cylinders Power Drive Wheels By Walter S. Klements May p 86

Hydrostatic Transmission for Yard Locomotives By Eric H. Bowers Dec. p 97

Selecting Fluid Motors For Driving and Towing By Lester L. Myers and D. J. Arnold Dec. p 84

Servo Pumps Synchronize Mr. Gus May p 96

Single Unit Divides Flow Equally By M. Van Dusen Dec. p 73

Stored Energy Closes Coal Car Doors By J. H. Mercier Dec. p 82

3 Efficient Speed Control Circuits With Variable Displacement Pumps Mar. p 72

PACKINGS

How To Design With Teflon Piston Rings By L. H. Gillespie Oct. p 128

O-Ring Compression Force By E. Cass and H. H. Schmiel Oct. p 132

Packing Materials For Fire-Resistant Fluids By E. W. Fisher Nov. p 74

Packing Materials For Hydraulics and Pneumatics By Seymour Datz July p 115

Packings, (Including Piston, Backup, and Wiper Rings)—Selection Guide Jan. p 106

What You Should Know About O-Rings For Air and Oil Circuits By Richard A. Freedman July p 128

PLUMBING

Aircraft Fittings . . . Why They'll Be More Reliable

By D. F. Collins Nov. p 114
Fittings, Hose & Assemblies—Selection Guide Jan. p 88
Fittings, Tube—Selection Guide Jan. p 92
How We Designed a Manifold By Allan M. Steel June p 76
Joints, Fluid Line—Selection Guide Jan. p 96
New Hose Construction for Higher Pressures By Robert W. Phillips Mar. p 98
Prefab Valve Panel Saves Engineering Time By W. P. Bartz Mar. p 74
Selecting Flexible Hose for Fluid Power Systems By D. Wendell Fentress Dec. p 70
Using Nylon Tubing By H. H. Campbell Oct. p 124
We're not Afraid of Valve Maintenance Anymore By Robert Cox and Joseph Briggs Dec. p 88

PNEUMATICS (Including air filters)

Aftercoolers, Air—Selection Guide Jan. p 64
Air Actuators Separate Thrust Unit Sept. p 87
Air-Controlled Hoppers Speed Loading By Lawrence Gardner Nov. p 102
Air Controls Oil Power On Army's New Bat By Frank A. Glomb, W. Horace Leathers, Jr. and Turner G. Timberlake May p 88
Air Nozzle Switches Rotary Actuator Circuit By Henry E. Boraten Nov. p 94
Air-Oil Circuit Cuts Power Costs By H. S. Schweizer June p 78
Air-Oil Edge Control By Alexander A. Toben Mar. p 90
Air Pilots Give Positive Cylinder Sequencing Oct. p 126
Air System Reduces Inspection By V. C. Diefendefer Mar. p 76
Air Valves—Directional Control By Allan E. Morris April p 68
Air Valves—Flow Control By Allan E. Morris April p 81
Air Valves—Pressure Control By Allan E. Morris April p 78
Air Valves Sequence Clamp, Work, and Eject Cylinders June p 98
All-Pneumatic Aircraft Actuation By John D. Hull, Jr. and A. E. Schmidlin May p 126
Automate Your Parts Feeding By Felix Zawaski Nov. p 75
Counterbalancing With Air By Ray Walsh Mar. p 80
Compressors, Air—Selection Guide Jan. p 66
Cylinders, Air—Selection Guide Jan. p 68
Electrical Controls Sequence Air-Oil Meat Press By Jack R. Clemens Mar. p 82
Filters, Air—Selection Guide Jan. p 80
Fine Control of Air Cylinders to Tip Ore Car By John W. Hislop May p 116
Fine Control With Three Air Pressures By William Burt July p 145
How To Determine Pneumatic Valve Response By Donald P. Grover Oct. p 91
How To Retract Air Cylinders By Elmer F. Heiser Mar. p 102
In-Flight Fluid Power on the Jupiter By Zelmar Barson Sept. p 148
Lubricators, Air Line—Selection Guide Jan. p 98
Motors, Air, Rotary—Selection Guide Jan. p 100
Pneumatic-Electric Interlock Assures Safe Press Operation By George M. Coon Aug. p 90
Press Ram Powers Die Cylinders By James V. Perrone Nov. p 93
Saving Air with Pneumatic Die Cushions By Don W. Smith Aug. p 88
Selecting Valves For Missile Pneumatics Sept. p 110
3-Position Weld Cylinder Has Two Pressures By W. S. Rudin Nov. p 85
3000-psi Air Systems for the Regulus By C. G. Brock Sept. p 126
Timed Air Circuit Speeds Bottle Handling By Milton B. Quitzow Nov. p 80
Timed Air System Improves Gound Finish By Edward Moldovan May p 112

PRESSES

Air-Oil Circuit Cuts Power Costs By H. S. Schweizer June p 78
Booster System Fits Molding Needs By Islyn Thomas May p 108
Cam Controls Pressure On Press Blank Holder Plate By W. L. Govan June p 72
Cylinder Design Gives High Force Stripping By John Danly, Jr., and Cecil E. Novinger April p 106
Discuss Fluid Power At Cyril Bath Mar. p 92
Double Differential Circuit Gives Fast Speed In Both Directions By Homer D. Wilson and James Bentley June p 82
Equalize Press Closing . . . Hydraulically . . . Mechanically By W. R. Matthews Mar. p 70
Equalizing 35,000 Tons By M. P. Sieger and A. K. Beedle June p 79
Motor Control Circuits For Hydraulic Presses By Kenneth B. Rexford Aug. p 76
Pneumatic-Electric Interlock Assures Safe Press Operation By George M. Coon Aug. p 90
Prefill Valves Sequence Pump and Accumulator Flow By R. A. Jacobson Nov. p 86
Press Ram Powers Die Cylinders By James V. Perrone Nov. p 93
Rapid Acceleration With a Servo-Controlled Pump June p 88
Saving Air with Pneumatic Die Cushions By Don W. Smith Aug. p 88
Synchronize Cylinders with a Torsion Bar By J. R. Fawcett Mar. p 78

PRODUCTION EQUIPMENT, CENTRAL SYSTEM DESIGN

Accumulator Raises Umbrella Output By Semour Garrett April p 104
Accuracy and Low Maintenance Put Hydraulics on Linotype By William B. Abbott May p 103
Air Nozzle Switches Rotary Actuator Circuit By Henry E. Boraten Nov. p 94
Air-Oil Edge Control By Alexander A. Toben Mar. p 90
Air Pilots Give Positive Cylinder Sequencing Oct. p 126
Air Valves Sequence Clamp, Work, and Eject Cylinders June p 98
Automate Your Parts Feeding By Felix Zawaski Nov. p 75
Boost To 5000 PSI To Pierce Auto Frames By John R. Danly, Jr. and Cecil E. Novinger May p 80
Central Water Hydraulic System Powers Forge Press Line By Kenneth E. Austin and Carl Beck June p 96
Design Ideas from a Large Stretch Forming Press By C. E. Blanchard June p 74
Fine Control with Three Air Pressures By William Burt July p 145
Fine Tilt Speed for a Furnace By J. L. Hoff and R. P. Rankin March p 94
How We Designed A Manifold By Allan M. Steel June p 76
Oil Circuit Pumps Water to Descale Forgings May p 92
Pilots Trigger Relief Valve By George MacLean Mar. 86
Protected Package Design Assures Safety By R. Curzon-Hope May p 118
Pump Controls for a Scrap Baler By William Hunter June p 90
Sequencing a Walking Beam Conveyor By Val A. Mayer May p 84
Servos Level 8-Ton Load By L. E. Farnsworth Feb. p 88
Speed and Tension Control with Variable Displacement Pump and Motor System May p 114
Tandem Cylinder Circuit Changes Board Width on Rip Saw By Gust Peterson May p 76
3-Pump Circuit Powers Large Expander By J. F. Coleman June p 116
Through Dirt, Steam, and Corrosion, Hydraulics Carries the Barrel By Jack Katz and Addison T. Smith April p 94

PUMPS

Circuit Changes Prevent Hunting of Compensated Pump By John P. Sharp and John P. Snyder Aug. p 73
Design of Pressure-Compensating Controls By Walter Ernst Nov. p 76
Flow Control Valve Positions Pump To Keep Constant Speed By R. J. Murphy Dec. p 92
Future Pump Parameters By Frank Mladinich Sept. p 81
How To Match Power Requirements By Elmer F. Heiser Aug. p 80
Pumps, Gear—Selection Guide Jan. p 110
Pumps, Reciprocating Plunger—Selection Guide Jan. p 114
Pumps, Rotary Piston—Selection Guide Jan. p 116
Pumps, Vane—Selection Guide Jan. p 118
Rapid Acceleration with a Servo-Controlled Pump June p 88
3 Efficient Speed Control Circuits With Variable Displacement Pumps Mar. p 72
3-Pump Circuit Powers Large Expander By J. F. Coleman June p 116

SERVO SYSTEMS & COMPONENTS

Accumulator System Supplies Six Servo Valves For Welding By John H. Brems June p 86
Atomic Submarines Use Electrohydraulic Servo Valves By Kenneth S. Knapton, Jr. and Dudley B. Hartung May p 78
Counterbalance Control With Servos By Ralph L. Ford Feb. p 94
Electrohydraulic Circuit Levels Combine Dec. p 102
Fast Response with 2-Stage Servos Sept. p 102
High Response Fluid Motors Drive Flight Simulator By Gerald J. Granros and John F. Wroten, Jr. Oct. p 148
How a Load Sensitive Flight Control System Works By John Burnett and Don Moses April p 110
How Contamination Affects Servo Valve Design By Richard E. Osgood Feb. p 79
Hydraulic Servomechanism Steers Towed Airplane April p 114
Operation of Autopilot Servo Actuators By Richard K. Smyth Mar. p 110

Rapid Acceleration with a Servo-Controlled Pump June p 88
Rotary Servo Valve for Aircraft Applications
By Jacques Faisandier Feb. p 100
Hydrostatic Transmission for Yard Locomotives
By Eric H. Bowers Dec. p 97
Separate Circuits Control Spindle and Tracers
By Earl P. Brane Feb. p 84
Servo Controlled Fluid Motors Drive Multi-Tool Machine
By Robert K. Sedgwick Feb. p 90
Servo Pumps Synchronize Mr. Gus May p 96
Servo Speed Control For Turbines
By R. B. Nichols and Lee N. Mockrud Feb. p 96
Servos Level 8-Ton Load
By L. E. Farnsworth Feb. p 88
High Frequency Vibration Tests Need Fast Servovalves
By Lee W. G. Beydler and W. W. McDowell Sept. p 97
Servo Valves Control Vanguard Engine Gimbals
By Gordon Scholes Sept. p 132
What You Can Get in Electrohydraulic Servo Valves
By Wayne Kinney and Phillip Weiss Feb. p 67

TEST EQUIPMENT

Air-Powered Test Rigs Improve Fighter Plane Production
By Leon N. Aldrich April p 116
Hot Fluid Test Chamber Mounts Components on a Portable Wall
By A. A. Meddock and E. J. Williams Aug. p 100
How the Bomarc Getz Flight Tested on the Ground
By Otto Grupp Sept. p 116
O-Ring Compression Force
By E. Cass and H. H. Schmiel Oct. p 132
Servovalves for Vibration Tests
By Lee W. G. Beydler and W. W. McDowell Sept. p 97
3 Fluid Motors Rotate 100-g Centrifuge
By D. T. Kuczon and R. C. Hinck Sept. p 134

VALVES

Air Valves Directional Control
By Allan . Morris April p 68
Air Valves—Flow Control
By Allan E. Morris April p 81
Air Valves—Pressure Control
By Allan E. Morris April p 78
Anti-Overrun Valve Controls Missile Erection
By Harvey Jacobs Sept. p 107
Deceleration with a Flow Control Valve
By Frank V. Acton May p 83
How To Determine Pneumatic Valve Response
By Donald P. Grover Oct. p 91
Rotary Servo Valve for Aircraft Applications
By Jacques Faisandier Feb. p 100
Selecting Valves for Missile Pneumatics Sept. p 110
Spring Loading Prevents Valve Spindle Galling
By Walter A. Calahan and Francis C. Hayes Aug. p 96
Valves, Directional Control, Air—Selection Guide Jan. p 122
Valves, Directional Control, Hydraulic—Selection Guide Jan. p 136
Valves, Flow Metering, Air—Selection Guide Jan. p 128
Valves, Flow Metering, Hydraulic—Selection Guide Jan. p 144
Valves, Pressure Control, Air—Selection Guide Jan. p 132
Valves, Pressure Control, Hydraulic—Selection Guide Jan. p 150

AUTHOR INDEX

Abbott, William B.
Accuracy and Low Maintenance Put Hydraulics on Linotype May p 103
Acton, Frank, J.
